traffic of your business**

Tata PRI Line Connection

Accelerate Your Business With Seamless Communication

In today's connected world, communication is the focal point of all events, activities and businesses. With rapid progress in technology, enhancement in communication has become the top priority for all companies. Irrespective of their size, enterprises are increasingly on the hunt for feasible, reliable and proven solutions to support their voice and data traffic requirements. This is where [Tata Primary Rate Interface \(PRI\) solution](#) can work its magic for businesses like yours.

Tata PRI Line Connection

Digital Connection For All Your Voice Needs

The Tata PRI solution is an end-to-end digital connection on our robust network infrastructure.

On a single link it provides your business the capability of upscaling and the flexibility for using multiple channels at the same time. Tata PRI solution is offered over both time-division multiplexing (TDM) and Session Initiation Protocol (SIP) technology. TDM offers 30 channels in one link while on single SIP link, you can increase channels as per your needs. Each channel offers two-way communication.

A close-up photograph of a computer keyboard. The central focus is a large, rectangular blue key with the words "Thank You!" printed in a white, sans-serif font. The key is slightly raised and has a soft shadow. Surrounding it are several white keys with black markings: a hyphen/underscore key, a semicolon/apostrophe key, a backslash/brace key, a comma/less-than key, and an "alt" key. The lighting is soft, highlighting the texture of the keys and the vibrant blue of the central key.

Thank You!
